English — Intermediate

TECHNICAL PROFICIENCY

Hospitality Tech Architect

B.S. Hotel & Tourism Business Administration + B.S. Software Engineering

I build the technology hotels actually need — designed by someone who lived the operation from the inside.

PROFESSIONAL PROFILE

Dual-degree professional: B.S. in Hotel & Tourism Business Administration (UDLA, Ecuador) and B.S. in Software Engineering (Santa Monica Academy, CA). This unique combination enables me to build technology that hotels genuinely need. I rose from entry-level positions (Houseman, Housekeeper) to Housekeeping Manager at Crescent Hotels & Resorts. That hands-on knowledge fueled the creation of Fleremahias PMS: my proprietary hotel management system featuring integrated AI, SRI electronic invoicing, and autonomous agents.

PROFESSIONAL EXPERIENCE

Founder & Lead Software Architect

Jan 2024 – Present

Fleremahias Hotels SaaS • Santa Monica, CA / Quito, EC

- Designed and built Fleremahias PMS: a SaaS hotel management platform with 8 integrated modules (reservations, front desk, housekeeping, SRI billing, maintenance, reporting, multi-property, digital guest QR) — purpose-built for Ecuadorian and LATAM hospitality.
- AI Receptionist Agent (LLM): Autonomous conversational agent that handles 80% of routine guest inquiries in under 2 seconds.
- SRI Electronic Invoicing: Direct integration — signed XML, electronic receipts, and automated submission via WebServices.
- Smart Check-In/Check-Out with identity verification and preference-based room assignment. Reduces front desk processing time by 70%.
- Digital Guest App (QR): No download required. Room service, housekeeping requests, maintenance, and real-time account balance.
- SaaS architecture on AWS with microservices, real-time WebSocket communication, offline-first mode, and multi-property support.

Housekeeping Manager

Oct 2021 – Present

Sandbourne Santa Monica • Crescent Hotels & Resorts

- Managed daily operations under premium standards, overseeing high-performance teams and ensuring exceptional guest experiences.
- Identified real operational friction points that became core PMS features and product requirements.
- Improved room turnover rate by 30% and reduced communication errors between housekeeping and front desk.
- Accelerated career progression: Houseman > Housekeeper > HK Manager in 2.5 years.

CERTIFICATIONS

- HTML5 Master Class
- React Master Class
- Python Master Class
- JavaScript Master Class
- SQL Master Class
- Node.js Master Class
- Angular Master Class
- CSS3 Master Class
- AWS Master Class
- DOM Master Class
- Frontend Tooling

KEY TECHNOLOGIES

Backend & Cloud

Python • Node.js • SQL • PostgreSQL
AWS • Microservices • REST APIs
• Supabase

Frontend & Mobile

React • React Native • Angular
JavaScript • TypeScript
HTML5/CSS3 • TailwindCSS

AI & Hotel Tech

Claude API • OpenAI API • LLMs
Autonomous Agents • Tool Use
• Automation

MY DIFFERENTIATOR

"I am the bridge between the operations team and the technology team. Having lived the hotel experience from the ground floor to management — I build tools that staff actually adopt."

HOTEL OPERATIONS EXPERIENCE

Field Experience & Guest Service

2019 – 2024

Le Merigot • Sandbourne • Ambridge Hotels
Crescent Hotels & Resorts • Santa Monica, CA

- Roles Held — Houseman, Housekeeper & Multi-Role: Cleaning operations, maintenance, and guest service at luxury hotels in Santa Monica, CA.
- Guest-Centric Service Philosophy: Committed to making every guest feel at home by anticipating needs and creating memorable experiences.
- Multi-Role Versatility: Collaborated with front desk, room service, maintenance, and housekeeping. This cross-departmental perspective became the foundation for designing software that connects all hotel departments.
- Real Friction Points Identified from Within: Broken communication, room service delays, lack of room status visibility. Every problem I experienced firsthand became a product feature in the PMS.

PROPRIETARY PRODUCT: FLEREMAHIAS PMS

Fleremahias PMS

Intelligent Hotel Management

SaaS platform designed 100% for Ecuadorian and Latin American hospitality. 8 integrated modules with real-time WebSocket communication. Three applications: PMS Web, Staff App (iOS/Android), and Guest App (QR, no download required). Offline-first mode. Hosted on AWS.

fleremias-landing.vercel.app • fleremias.dev

Operations Dashboard — Main Panel

Real-time KPIs: occupancy, check-ins, revenue, live orders, and housekeeping status.

8 INTEGRATED MODULES

1. Tape Chart & Reservations

Gantt view, drag & drop
